Table of Contents

[Preface](#)

[Acknowledgements](#)

[Executive summary](#)

[Chapter 1 - Introduction](#)

[Chapter 2 - Saline waters as resources](#)

[Quality characteristics of saline waters](#)

[Definitions and Indices of Salinity Related Parameters](#) [Classification of Saline Waters](#)

[Sources and availability of saline waters](#)

[Chapter 3 - Examples of use of saline waters for irrigation](#)

[United States of America](#)

[Israel](#)

[Tunisia](#)

[India](#)

[Egypt](#)

[Chapter 4 - Water quality assessment](#)

[Concerns and limitations](#)

[Effects of Salts on Soils](#) [Effects of Salts on Plants](#) [Effects of Salts on Crop Quality](#)

[Criteria, Standards and Considerations in the Assessment of the Suitability of Saline Water for Irrigation and Crop Production](#)

[Criteria and Standards for Assessing Suitability of Saline Water for Irrigation](#)

[Considerations in Assessing Permeability and Tilth Hazards](#)
[Considerations in Assessing Salinity and Toxicity Hazards](#)

[Methods and models for assessing the suitability of saline water for irrigation and crop production](#)

[Use of the Watsuit Computer Model](#)
[Description of input requirements and operation of Watsuit model](#)
[Example of use of the Watsuit model](#)
[Use of a Non-computer Version of Watsuit Model](#)
[Use of a production-function model](#)

Chapter 5 - Environmental and ecological aspects

[Nature and causes of environmental problems](#)

[Soil degradation \(salinization and waterlogging\)](#)
[Water pollution](#)
[Ecosystem disturbances](#)
[Water-borne diseases](#)

[Impacts of blending on water usability and pollution](#)

Chapter 6 - Management principles and practices for safe use of saline water

[Management guiding principles](#)
[Management for crop production](#)

[Growing suitably tolerant crops](#)
[Managing seedbeds and grading fields to minimize local accumulations of salinity](#)
[Managing soils under saline water irrigation](#)
[Operating delivery systems efficiently](#)
[Irrigating efficiently](#)
[Monitoring soil water and salinity and assessing adequacy of leaching and drainage](#)

[Management for environmental protection](#)

[Practices to control salinity in water resources](#)
[Integrated strategy to facilitate the use of saline waters for irrigation, to minimize drainage disposal problems and to maximize the beneficial use of multiple water sources](#)
